Please replace the paragraph beginning at page 7, line 17, with the following amended paragraph:

at

Briefly, herein is described a system which uses various hand-held devices to derive benefits from the reception of auxiliary data. Auxiliary data is encoded by modulation of a signal, such as video, which thereby creates a composite video signal consisting of auxiliary data and continuous video program data. The composite video signal is transmitted to and displayed by a display device so that it may be received and used by a hand-held device.
